GAIA ecotherapy

By intimately connecting with the olive tree and its incomparable fruit we step into an in-depth understanding of the sacred relationship with the olive tree that Greeks have for thousands of years.

It is on Crete, in the pristine nature of Sfakiá that together we will time travel from the Minoan period to today's modern olive cultivation, retracing thousands of years of history, to immerse ourselves in the mythology and eternal wisdom that surround Cretan olive trees.

Let's learn from the olive trees first hand and meet these very special ecologic and energetic beings with their special gifts to give and ancient wisdom to share.

Establish a healthy connection with Mother Earth!
